

Future Ideas for the game

The tight time frame didn't allow us to unleash our full potential. We are all students, and time is a limited resource. We have plenty of other ideas for further development of the game.

- More planets and locations to visit. The space is extremely large and there is huge potential for other amazing places to see.
 - Side quests
 - Space fighting while inside the ship
 - A true server for communications inside the universe
 - An new open-world experience after you finish the game and you are outside the time loop
 - Different planets and objects that explore even more the concept of time relativity
 - More cool music in the radio :D
 - Customizable Ship
 - The ability to order drinks and food inside the bar
 - Side quests related to the dating app
 - Helping Oevr go back to his family
